The WorkWagon difference

■ **Used on a working farm, not a showroom**

No custom rims, wrap packages, or influencer hype. It's the wagon our own farm uses for feed, firewood, and daily chores in Northern Michigan.

■ **Rated for 800 kg (1,764 lb)**

A published safe load rating on a powder-coated steel deck — a number you can plan real work around.

■ **No dealer in the middle**

You buy straight from the people who stand behind it. Questions, parts, and service go to our farm team.

■ **One honest price**

\$2,798 with no checkout surprises. Many electric wagons start near \$3,000 before freight and add-ons.

■ **Freight that's spelled out**

Free delivery anywhere in Michigan. Flat regional freight elsewhere, residential liftgate included.

■ **No pressure, no fake scarcity**

No countdown timers or "last build slot" tricks. Tell us about your property and we'll tell you honestly if it fits.
